PROFILE

Energetic and dedicated DevOps enthusiast with a strong academic background. Proficient in Linux systems and eager to apply AWS cloud knowledge to drive efficient software development. Fast learner, collaborative mindset, and excellent problem-solving skills. Seeking opportunities to contribute to innovative DevOps projects and make a meaningful impact.

TRAINEE

STL Academy (Patna)

Cloud Computing

AWS hands-on Services

- Deploy server via Amazon Linux OS.
- Web hosting by using a web server like **Apache & Nginx**
- Manage Project using CI-CD Pipeline.
- For better cloud security use AWS MFA Service and LDAP
- Hands-on experience on Cloud Watch and Cloud Formation

PROJECTS

SMS (School Management System)

Tech Stack: C, Oracle 10g, VB .Net

Project Description

- School Management System can be used by education institutes to maintain the records of students, staff, and general management.
- The system is designed to be used at more than one branch of the school. Initially, we have rules for two branches, which could be enhanced as per requirement.
